

Australian Corporate Database

PROFILE

Containing a massive 606,000 companies with over 690,000 contacts, this database dwarfs other corporate contact files. This database provides the means to reach Senior Decision-Makers in hundreds and thousands of businesses that have never been available in one source before. Its coverage of cities outside of the State capitals is also unsurpassed, for mail, phone & many more records have Personalised Emails (page 2.)

The file contains businesses of all sizes, from large multinationals to smaller businesses that provide employment to the majority of Australians and is constantly verified. This can also be de-duped against your in-house database prior to delivery at minimal charge.

Is your database not up to speed? Missing fields like people names, addresses, phone numbers, email address or fax numbers? We can append many these fields to your in-house database! What we do initially is take a sample of your data and fully review it. We let you know the rough match-up level & this gives you a snapshot of the initial integrity of what you have (at no charge).

SELECTIONS

Top 40,000 Companies, (140,000 Senior Management) small businesses (mostly with less than 20 employees), Fax numbers, Industry, Position, State, Postcode & ABN or A.C.N.

Mailing, Telemarketing & Fax Counts – all Personalised

The last word.....

If the data you want isn't available "off the shelf", we may be able to specifically create that audience. There are 2 options....at a \$300 set up and for Company Name, Industry, Phone, Company preferred Contact Email (personalised where available) and address on most, for \$1.95 each & gst. Where we can get a Senior Manager Contact, its \$2.95 per record & gst with all these data elements noted. Both databases have a 90% plus deliverability guarantee, (excl. "soft" bounces due to full mailboxes, servers down). For Personalised records where the Email address isn't available or not disclosed, that data would be provided to you at \$1.25 each plus gst for Personalised data. Most importantly, this data is provided to you for **multiuse** and ongoing contact.
